Incyte Announces Progress on Global Responsibility Initiatives and Sets Corporate Goals for the Next Four Years

WILMINGTON, Del. – July 28, 2021 – Incyte (Nasdaq: INCY) today announced important progress within its Global Responsibility initiative with the publication of its 2020 Global Responsibility Annual Report and, for the first time, committed to a set of corporate goals intended to drive further action.

“We are proud of the progress we’ve made in the five key areas we outlined when we established our Global Responsibility initiative,” said Hervé Hoppenot, Chief Executive Officer, Incyte. “We recognize that protecting the environment is an important part of our mission. Setting specific goals reinforces our commitment and helps drive meaningful change – decreasing our impact on the environment while increasing transparency to our key stakeholders.”

Since establishing the Global Responsibility initiative in 2019, Incyte has made advancements in its key areas of focus – Patients, Community, Team, Environment and Risk Management. These advancements are discussed in more detail in the 2020 Global Responsibility Annual Report.

Patients remain the top priority at Incyte, and the Company was granted four regulatory approvals – two in the U.S. and two outside of the U.S. – for orphan drug indications in 2020 and so far in 2021.

Minimizing impact to the environment is a significant priority for Incyte. As of January 1, 2021, the electricity for our U.S. Headquarters is sourced from 100% renewable sources. In addition, our U.S. Headquarters have become landfill free in the last two years.

In an effort to improve upon these achievements and strengthen its commitment, Incyte has now committed to a set of corporate goals, designed to decrease its impact on the environment and increase transparency. Over the next four years, the Company intends to:

- Receive Green Globes Certification for its newly constructed building, part of its U.S. Headquarters in Wilmington, DE
- Report under the Task Force on Climate-related Financial Disclosures (TCFD) Framework by 2023
- Complete transition to hybrid and electric vehicles for its Field Fleet by 2025
- Achieve operational Carbon Neutrality through a combination of absolute reductions and offsets by 2025
